BRACELET SIZE GUIDE

Determine your exact bracelet size with this printable guide. Verify accuracy with the credit card test below.

Place credit card here to confirm
your guide has printed to scale.

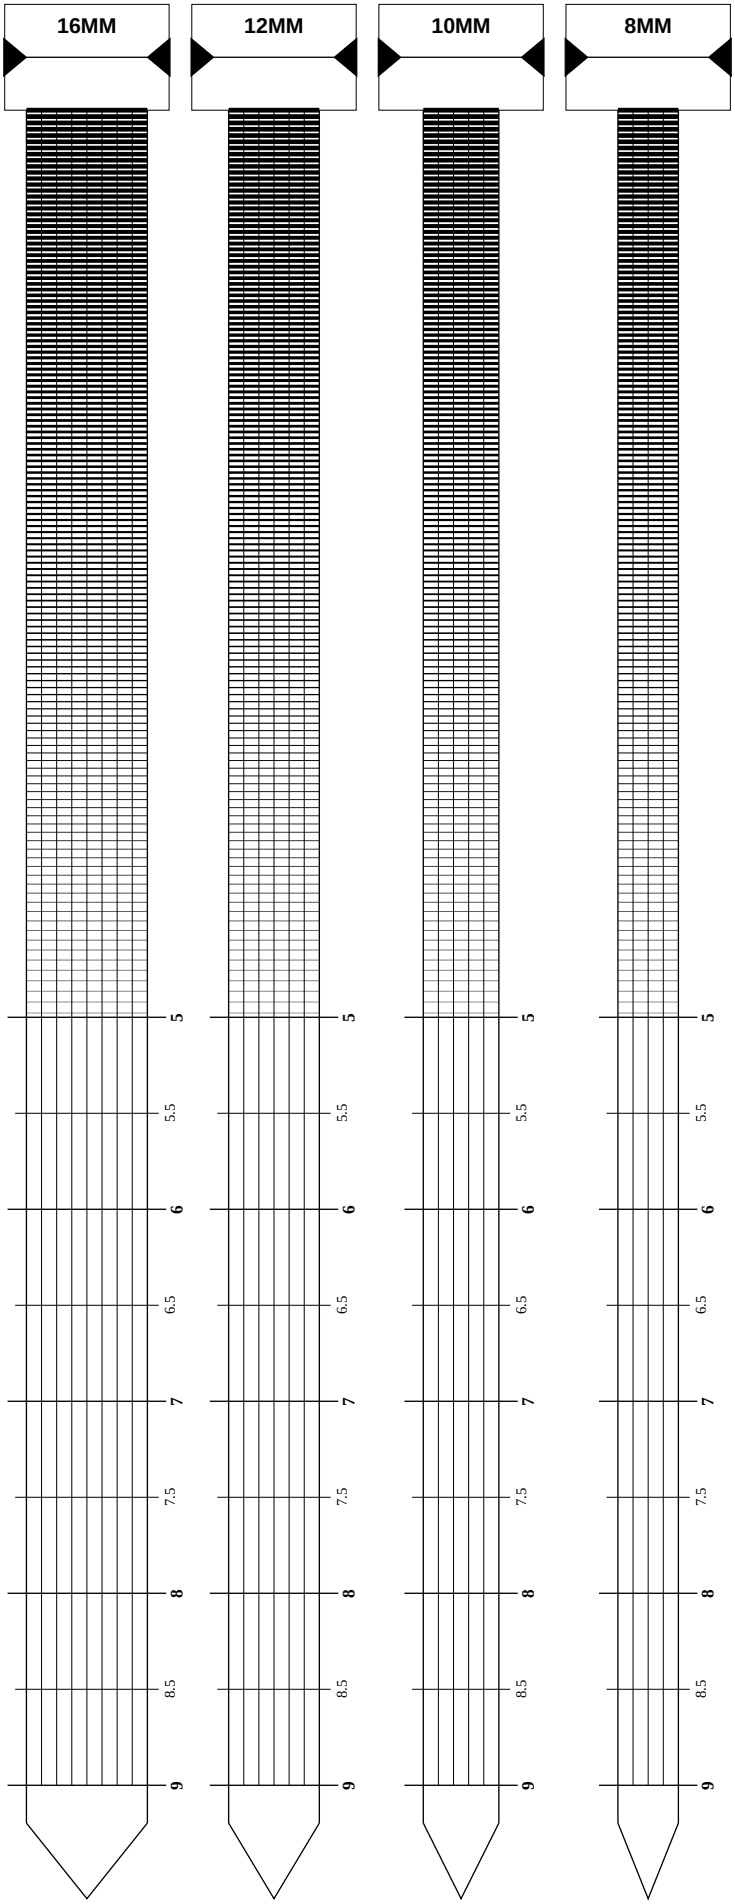
INSTRUCTIONS

1. Select your bracelet width that you wish to order.

2. Cut tightly along the outer lines. This is the width of your bracelet.

3. Place the ruler around the wrist, around the wrist joint where you typically measure.

4. The two arrows facing in at the top will point to your wrist measurement.

5. We highly suggest you move one size up adding 0.25-0.5" from your reading for comfort. For example if you read a size 6.5-6.75" you should purchase a bracelet length 7.0".


6. If you are in between sizes, round up to the higher option. For example, if you read a size 7.15" then select a bracelet length 7.5".
